

DORO® QR3 HEADREST SYSTEM TEFLON®

DORO® QR3 HEADREST SYSTEM TEFLON®

The DORO® Teflon® Headrest System is a mechanical support system which is used in head and neck surgery. This system allows the patient's head to be positioned and secured during the operation. It can be used for cranial fixation of the patient in diverse positions.

By adapting the Teflon® Headrest System to the QR3 format, all the beneficial features of this state-of-the-art skull clamp design become available for the Teflon® series.

Furthermore the PMI exclusive Teflon® coating allows it to be reprocessed in a washer/disinfector. The complete headrest system conforms to WHO Infection Control Guidelines, is machine washable, disinfectable and autoclavable.

DORO® QR3
HEADREST
SYSTEM TEFLON®
IS AUTOCLAVABLE.

Please find further information on the product's web page.

FEATURES

- New QR3 Quick-Rail® technology for quick connection of accessories like the new **DORO LUNA®** Retractor System as well as Retractor Arms, J-Arms and Halo Retractor Systems.
- Autoclavable.
- Machine washable.
- Conforms to WHO Infection Control Guidelines for cleaning and sterilization.
- Navigation ready.
- 3-pin rigid cranial fixation.
- For supine, prone, lateral or sitting positions.

For lateral positioning, we recommend the **DORO®** Base Unit Parkbench (not Teflon® coated) (item no. 3001-006).

Sitting positions: Only in conjunction with the **DORO®** Crossbar Adaptor (not Teflon® coated) (item no. 3007-00).

- Excellent stability and flexibility.
- Exclusive – only available from PMI.
